ASHRAFUL ANAM ALVE

Address: Dhaka Commerce College, Mirpur 2, Dhaka, Bangladesh

Email: asrafulanamalve45@gmail.com

GitHub: https://github.com/AshrafulAnamAlve

Phone: 01876935462 (Primary) | 01403666384 (Secondary)

OBJECTIVE

Proficient in ASP.NET (C#, MVC, Core, ASP.NET Core Web API, Angular) with strong knowledge of modern web technologies. Skilled in SQL, and web development with hands-on experience in creating practical solutions. Experienced in HTML, CSS, and Bootstrap, and use GitHub for project collaboration. Additionally, have a solid foundation in Java and eager to apply my programming and problem-solving skills to real-world projects.

Work Experience /Training

ASP.NET Full Stack Development Training
Institute: ISDB-BISEW (Islamic Development Bank – Bangladesh Islamic Solidarity Educational Wakf)
Duration: 6 Months
Key Focus Areas: C#, ASP.NET MVC, ASP.NET Core, Web API, SQL Server, and Angular
Overview: Completed professional training focused on developing dynamic web applications using ASP.NET technologies. Gained hands-on experience in backend and frontend integration, API development, and database connectivity.

TECHNICAL & ADDITIONAL SKILLS

Proficient in C#, ASP.NET MVC/Core, Web API, and basic Java. Experienced with HTML, CSS, JavaScript, Angular, and database management using SQL Server and MySQL. Skilled in Visual Studio, NetBeans, and Microsoft Office, with strong computer literacy and sound programming fundamentals.

PROJECT

eLibrary – Library Management(ASP.NET Core, Angular,SQL Server)

A full-stack library management platform with secure Admin and User roles. Users can register, get approval via email, search and order books, and view orders. Admins manage books, categories, and users; handle book returns with fine calculation; block or approve accounts based on fines; and send email notifications directly through the system. Built using ASP.NET Core Web API, Angular, and SQL Server for a secure and efficient experience.

Employee Portal – CRUD Web Application (ASP.NET Core & Angular)

Built a full-stack CRUD application using ASP.NET Core Web API for the backend and Angular for the frontend. Implemented RESTful APIs for efficient data operations, integrated a responsive UI, and followed clean code and secure data handling practices.

GitHub: github.com/AshrafulAnamAlve/EmployeePortal

Lost and Found System – Java & MySQL Desktop Application

Developed a desktop application to manage lost and found items with secure Admin and User roles. Features include adding and managing item and owner details, viewing combined information, and exporting reports to PDF. Designed to provide a user-friendly and efficient platform for tracking and retrieving lost items.
